

The MailFinisher 6600 system is a High volume In-Line System which is interfaced with a compatible laser printer, whereby the printer feeds the MF6600 directly and the forms are printed, folded and sealed in one single operation, therefore, speeding up the processing and also making it easier for the operator. The High Capacity Automatic Extending Output Conveyor which comes as a standard feature with this machine provides the user with easy continuous unloading of up to 800 sequenced documents.

The MF6600N/TN/MAXI is provided with a Tray Management Cabinet System and auto extending conveyor as standard providing a dedicated floor standing system with easy continuous unloading of up to 500 sealed forms. Please let us know your tray management requirements before placing your order

The optional Vertical stacker can be retro fitted to this machine.

Technical and Options information on the following page ►

MailFinisher 6600N / TN / Maxi

Precision equipment ready to save time, money and resources.

The system is only compatible with the following printers providing up to 2,500 sheet in-feed capacity (based on 80gsm paper).

HP LJ4250TN with additional 1,500 sheet paper tray
HP LJ4350TN with additional 1,500 sheet paper tray
HP LJ4014TN with additional 1,500 sheet paper tray
(Latest HP Model)

HP LJ4015TN with additional 1,500 sheet paper tray
(Latest HP Model)

HP LJ4515TN with additional 1,500 sheet paper tray
(Latest HP Model 60 PPM !!)

The MF6600 can also be used as a High Speed 'Offline' machine, where forms are processed through the machine by loading manually once the forms are printed separately (see PostMate6).

- ▶ Form Size: Depth up to 14" / Width up to 265mm
- ▶ Hopper Capacity: 800 sheets only when in Off-Line Mode
- ▶ Speed: 3,720 fph in-line / 9000 fph Off-Line
- ▶ Fold Settings: Z/EZ/C/EC/V/ Double fold
- ▶ Paper Weight: 60-120gsm
- ▶ Counter: Digital reset batch count
- ▶ Jam Release: Auto / Manual
- ▶ Duty Cycle: 3000,000 form pm
- ▶ Weight: 60kgs
- ▶ Dimensions: 415 x 600 x 385mm (WxLxH)
Excludes Printer
- ▶ Warranty – 12months (parts only)

Accessories / Options

Tray Management Cabinet

The optional tray management cabinet is available for laser printers fitted with either an additional 500 sheet paper tray or the extra 1500 sheet paper tray. Both of these fitted together gives a forms capacity of 2,500 sheets based on 80gsm paper weight. Please call us to discuss further.

Vertical Output Stacker

High Capacity Output Vertical Stacker which holds up to 800 printed forms and also provides easy unloading whilst processing in sequence.

Print Rotation Solution (PRS)

An optional PRS can be fitted to the HP laser printer which enables 180 degree print rotation by way of a unique software.

Please note the following:

The laser printer is not unique to this machine; it can still be used as a normal office laser.

The processing speed of the system is regulated by the page per minute of the printer.

Laser printer sold separately.

180 degrees print rotation MUST be specified to allow for the correct paper orientation to the sealer. This is a selectable option using the standard Windows driver. If you are not using a Windows driver and cannot rotate the print via your operating software, an optional Print Rotate Solution (PRS) can be installed in the printer (HP only) which will allow print rotation. For the PRS to operate correctly, the driver software must be PCL5e, as PCL6 is not supported. The system printer cannot be connected via parallel cable, only by USB or network cable.
