

The MailFinisher 4300TN/Maxi system is a medium to high volume In-Line System which is interfaced with a compatible laser printer, whereby the printer feeds the MF4300 directly and the forms are printed, folded and sealed in one single operation, therefore, speeding up the processing and also making it easier for the operator.

The MF4300TN/MAXI is provided with a Tray Management Cabinet System and auto extending conveyor as standard providing a dedicated floor standing system with easy continuous unloading of up to 500 sealed forms. Please let us know your tray management requirements before placing your order.

An optional High Capacity Vertical Output Stacker is available, allowing for easy unloading of up to 800 sequenced forms.

Technical and Options information on the following page ►

## MailFinisher 4300TN / Maxi

MF4300TN

MF4300Maxi

The system is compatible with the following printers providing either 1,000 sheet in-feed capacity as a TN version or 1500 sheets as a MAXI system (based on 80gsm paper).

HP LJ4200TN

HP LJ4250TN

HP LJ4300TN

HP LJ4350TN

HP LJ4014TN - (Latest Model)

HP LJ4015TN - (Latest Model)

HP LJ4515TN - (Latest HP Model 62 PPM !!)

The 1500 Sheet feeder will be required for the MAXI system. The MF4300TN/MAXI can also be used as an 'Offline' machine, where forms are processed through the machine by loading manually once the forms are printed separately (see PostMate3).

## Tech info

- ▶ Form Size: Depth up to 14" / Width up to 265mm
- ▶ Hopper Capacity: 800 sheets only when in Off-Line Mode
- ▶ Speed: 3,720 fph in-line / 5,700 fph Off-Line
- ▶ Fold Settings: Z/EZ/C/EC/V/ Double fold
- ▶ Paper Weight: 60-120gsm
- ▶ Counter: Digital reset batch count
- ▶ Jam Release: Auto / Manual
- ▶ Duty Cycle: 125,000 form pm
- ▶ Weight: 48kgs
- ▶ Dimensions: 415 x 600 x 385mm (WxLxH)  
Excludes Printer
- ▶ Warranty – 12months (parts only)

## Please note the following:

The laser printer is not unique to this machine; it can still be used as a normal office laser.

The processing speed of the system is regulated by the page per minute of the printer.

Laser printer sold separately.

180 degrees print rotation **MUST** be specified to allow for the correct paper orientation to the sealer. This is a selectable option using the standard Windows driver.

If you are not using a Windows driver and cannot rotate the print via your operating software, an optional Print Rotate Solution (PRS) can be installed in the printer (HP only) which will allow print rotation.

For the PRS to operate correctly, the driver software must be PCL5e, as PCL6 is not supported.

The system printer cannot be connected via parallel able, only by USB or network cable

## Accessories / Options

### Vertical Output Stacker

High Capacity Output Vertical Stacker which holds up to 800 printed forms and also provides easy unloading whilst processing in sequence.

### Print Rotation Solution (PRS)

An optional PRS can be fitted to the HP laser printer which enables 180 degree print rotation by way of a unique software. This will be supplied as a SD Card for the HP4000 series and a USB device for the new Hp4515 series

Lockable folding plates as standard
